

# USING NATURE KIT TO WORK OUT WHAT TO PLANT IN DIFFERENT AREAS OF YOUR FARM.

Lets use as an example the groups' 2021/22 VLG funded project on the Westaway's property. Here is a screen shot from Google earth of the project. You can see the Ruby Fairbank Road in the top left of the image

Here is the same area in Nature Kit. Note we have checked the pre European vegetation tick box to see what EVC - Ecological Vegetation class was present before clearing. In the project area there is some Wet Forest (WF) and Damp Forest (DF)
